ROGER MILLA PROGRAM
CHARITY FOR CHILDREN

Introducing the Roger Milla Program

A message from Roger Milla

Dear friends,

Football has given me extraordinary moments and the affection of millions of people. Today, I want to use that power to bring people together for a cause close to my heart: children's health, dignity and future.

That is the purpose of the **Roger Milla Program.**

Our ambition is to mobilise support so that the most vulnerable children can access healthcare, safe drinking water and dignified living conditions.

Through our **"Red Card to Noma"** campaign, we aim to raise awareness of this disease, support prevention and engage families, healthcare professionals, institutions and the public. Behind every child affected is a life, a family and a future deserving of our attention.

We are also preparing the **Roger Milla Hospital Centre of Excellence project in Yaoundé, Cameroon.** Its purpose is to provide free maxillofacial and reconstructive surgery for children across Africa living with the long-term effects of noma or a congenital facial malformation.

ROGER MILLA PROGRAM
CHARITY FOR CHILDREN

To support this ambition, we distinguish between two needs: funding to build and equip the centre, and resources for children's future free care. The **Special Fund for Children Waiting for Facial Surgery** is dedicated to this second objective.

Our commitment also extends to **lasting access to safe drinking water in schools and villages across Africa.** We aim to support facilities suited to communities' needs, with arrangements for their maintenance and reliable long-term operation.

And because solidarity reaches beyond borders, we are also mobilising to **help children in Gaza get through the winter**, in partnership with **DIGNITÉ Internationale.** This campaign aims to support the provision of tents, blankets, hot meals, safe drinking water and essential supplies, according to needs and operational possibilities on the ground.

These projects require work, partners and resources. We want to move them forward responsibly, explaining clearly what we are preparing, which funds have actually been received and what actions have been completed.

Everyone can contribute: by making a donation, sharing a campaign, signing the petition against noma, offering their skills or opening the door to a partnership.

On the pitch, I learned that great victories are achieved together. Today, I invite you to join our team for children.

Together, let's bring health, dignity and hope to children.

Every action counts.

Roger Milla
Founder and President of the Roger Milla Program
